the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.4 billion (United Nations 1999).

There is a growing awareness of the need to address the needs of the young and the old. The United Nations (1999) has identified the need to address the needs of the young and the old as one of the eight Millennium Development Goals. The United Nations (1999) has also identified the need to address the needs of the young and the old as one of the eight Millennium Development Goals.

The United Nations (1999) has identified the need to address the needs of the young and the old as one of the eight Millennium Development Goals. The United Nations (1999) has also identified the need to address the needs of the young and the old as one of the eight Millennium Development Goals.
